ALBANY, Aug. 1.—State Superintendent of Insurance Hotchkiss has issued a certificate to the Provident Savings Life Assurance Society in substance authorizing the society to issue new policies and izing the society to issue new policies and stock voting trust certificates.

Depositors of PREFERREE

Owing to controversies between stock-holders, large deposits in the so called Thomas banks and extravagant manage-Thomas banks and extravagant manage-Thomas banks and extravagant management, a joint examination was conducted in 1907 by the Insurance departments of New York and Colorado, and on such examination the company was found to be impaired to the extent of about \$415,000. It was therefore ordered to cease writing new business. Later there were radical changes in management, resulting in the choice of former Commissioner of Insurance E. E. Rittenhouse of Colorado as the president of the company. Savings not only in the natural increases as the president of the company. Savings not only in the natural increases which follow a cessation in the writing of new business, but also in loading and mortality, have made it possible for this company in a little less than two years not only to wipe out the impairment but also to establish a surplus, the total gain being nearly \$500,000. The examiners in concluding their report say:

"The inherent strength and latent energy of a life insurance company and the tenacity of its business are shown in the history of this company during the last two years. In spite of the burden placed upon it by the personal interests under former managements selfishly attempting to use it for their own financial gain, it has regained its position as a solvent company, measuring up to and above the line setablished by the law of this

gain, it has regained its position as a solvent company, measuring up to and above the line established by the law of this State for life insurance corporations desiring to sell their policy contracts to its citizens. The future must depend upon the ability, fidelity and energy of the ownership and management.
